Dear Sirt

MYDRO-MINETRIC POWER COMMISSION OF ONTARIO OTTAVA SYSTEM

In accordance with your instructions we have examined the correspondence files and accounting records of the Hydro-Electric Power Commission of Ontario for the purpose of obtaining historical data covering the period from the initial negotiations to October 31, 1921, in connection with this System.

In view of the fact that the Ottess System consists of only one municipality, namely, the City of Ottass, we have not prepared the information in the form used in connection with the other Systems. The early negotiations are referred to in more or less detail in our report of November 7, 1922. We give below, however, a summary of such details, together with a tabulation covering the average horse power loads for each of the several years, and the average cost per horse power.

Date of application for power from H.E.P.C. - July 17, 1906

By-low:

Date passed by municipality - January 21, 1907

Date ratified by Provincial Legislature - not yet ratified

hearteen a arrest of race defails, together with a telephonical

Contracts:

(1) July 31, 1907 Date

(2) December 6, 1910 (3) February 2, 1914

Date validated by Provincial Legislature:

Contract under date of February 2, 1914, was validated on May 1, 1914; the first two contracts apparently were not validated.

A summary of the average horse power loads and the average cost per horse power to this municipality for the 6 months ending October 31, 1915, and the 6 years ending October 31, 1921, follows:

Feriod				Average Load in horse power	Average Cost per horse power
6 months ending October Year ending October				3750.0 4241.9 5039.7	\$14.05 14.06 14.10
9	10-	*	31,1918	5829.0	14.11
344	iii	*	31,1919	6158.0	14.10
**	额	81	31,1920	6764.0	14.14
65	糖	**	31,1921	7694.0	70.02

Throughout the entire period from July 1907 to October 31, 1921, the power supply of the City of Ottawa was purchased from the Ottawa and Hull Power and Hanufacturing Company, Limited. It would appear, however, that prior to May 1915 the Power Company billed the City direct, and that subsequently thereto the billing was made through the Hydro-Electric Power Commission of Ontario.

Attention may be called to the fact that the difference between the contract price at which the power was purchased by the Commission and the actual cost chargeable to the City of Ottawa represents interest and sinking fund charges on metering equipment owned by the Commission.

Yours very truly,
